

# aircraft refuelling guide

**2018/19**  
australia & new zealand

# australia

Stated hours of operation may change without notice. Some airports are not attended continuously during the hours nominated and notice may be required to obtain service.

**At some locations, an after hours call out fee may apply, which is normally calculated by and paid directly to the operator. We recommend pilots phone ahead to check fuel availability and call out fee if applicable.**

All information and details are correct at the time of printing, November 2018. Air BP strongly advise that pilots check with the Airfield Representative at relevant locations to accommodate flight requirements.

# conversion tables

conversion factors - avgas

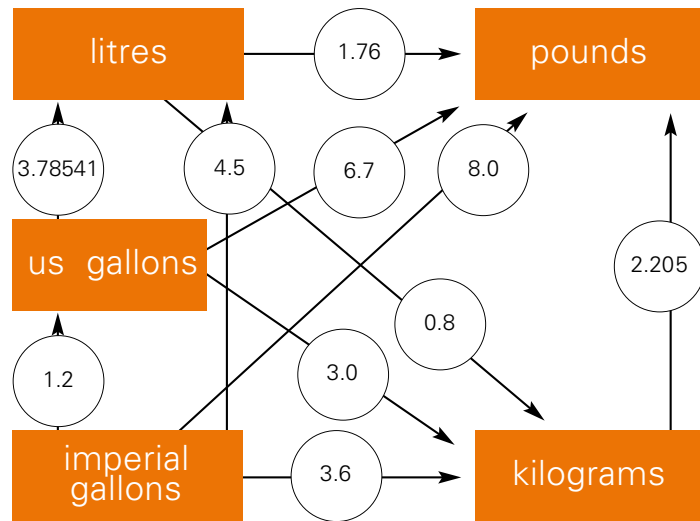

conversion factors - jet a-1

For Avgas (ex-Kwinana, WA) at SG=0.695

Note: with arrow, multiply by factor shown; away from arrow, divide by factor shown.

For Jet A-1 at SG=0.8

Note: with arrow, multiply by factor shown; away from arrow, divide by factor shown.

# first aid

## Avgas 100 & Avgas 100 low lead

### **Eyes**

Wash eyes thoroughly with copious quantities of water, ensuring eyelids are held open. Obtain medical advice if any pain or redness develops or persists.

### **Skin**

Wash skin thoroughly with soap and water as soon as reasonably practicable. Remove heavily contaminated clothing and wash underlying skin.

In extreme situations of saturation with this product, drench with water, remove clothing as soon as possible and wash skin with soap and water. Seek medical advice if skin becomes red, swollen or painful.

## Jet A-1 & Jet A-1/FSII

### **Eyes**

Wash eyes thoroughly with copious quantities of water, ensuring eyelids are held open. Obtain medical advice if any pain or redness develops or persists.

### **Skin**

Wash skin thoroughly with soap and water as soon as reasonably practicable. Remove heavily contaminated clothing and wash underlying skin.

### **Ingestion**

If swallowed, do not induce vomiting, give a glass of water and contact a doctor or the Poisons Information Centre.

## medical advice

Product can be aspirated on swallowing or following regurgitation of stomach contents, and can cause severe and potentially fatal chemical pneumonitis, which will require urgent treatment. Because of the risk of aspiration, induction of vomiting and gastric lavage should be avoided. Gastric lavage should be undertaken only after endotracheal intubation. Monitor for cardiac dysrhythmia. This is general advice only. Please consult your medical advisor. Air BP accepts no responsibility or liability for this advice.

## Ingestion

If swallowed, do NOT induce vomiting; obtain medical advice immediately. Except as a deliberate act, the ingestion of large amounts of product is unlikely. If it should occur, do not induce vomiting; obtain medical advice as soon as possible.

If exposure to vapour, mists, or fumes causes drowsiness, headache, blurred vision or irritation of the eyes, nose or throat, remove the source of contamination or move the victim to fresh air.

Ensure airways are clear and have qualified person give oxygen through a facemask if breathing is difficult. Apply artificial respiration if not breathing and seek medical attention.

Monitor breathing and pulse rate and if breathing has failed, or is deemed inadequate, respiration must be assisted, preferably by the mouth-to-mouth method (expired air resuscitation).

Administer external cardiac massage if necessary. Seek medical attention immediately.

## Inhalation

If fumes are inhaled, the patient should be removed to fresh air and if recovery is not immediate, medical assistance must be called without delay.

If breathing has failed, respiration must be assisted, preferably by the mouth-to-mouth method (expired air resuscitation).

## protective clothing

Wear a face visor or goggles in circumstances where eye contact can accidentally occur. If skin contact is likely, wear impervious protective clothing and/or gloves.

Change heavily contaminated clothing as soon as reasonably practicable and launder before re-use. Thoroughly wet down before removing clothing due to the risk of static discharge igniting vapour. Wash any contaminated underlying skin with soap and water.
